ABOUT GROW LONDON GLOBAL

Grow London Global is a free 12-month programme for London-based tech companies that want to expand internationally - the successor to the Mayor's International Business Programme, which has helped 1,300 London scaleups including Monzo, Revolut, Checkout.com, Brompton Bicycles, Mr & Mrs Smith and Bloom & Wild reach their global expansion goals.

The programme offers expert advice, workshops, events, networking opportunities with partners, corporates, investors, peers as well as unrivalled opportunities to make valuable contacts into your target market on trade missions across the world.

For more information, visit: grow.london/global

AMPERSAND⁺

Ampersand Health is a long term conditions management company focused on complex diseases in immunology and inflammation. The company, whose impact is demonstrated across 15 studies (mostly in North America), reduces healthcare costs and improves patient outcomes for over 50,000 patients in 193 countries worldwide.

Nader Alaghband
Co-Founder

DLOC BIOSYSTEMS

DLOC Biosystems is revolutionizing drug development with advanced organ-on-chip technology that mimics human physiology. Their platform enables more accurate, ethical, and cost-effective preclinical testing. They help pharma companies de-risk R&D by improving predictability and enabling personalized medicine — a game-changer for stakeholders seeking innovation in life sciences.

Wadah Malaeb
Founder & CEO

Feedback Medical

Bleepa from Feedback Medical Ltd is a UKCA-marked, secure clinical platform enabling remote, asynchronous reviews of patient data and diagnostics. Integrated with EHRs, it reduces outpatient appointments by up to 90%, boosts productivity 5-6x, and cuts review times to 7.5 minutes. UK data shows \$8M/year in savings and revenue uplift In Year 1.

Tom Oakley
CEO

iOWNA

iOWNA is transforming chronic care. It turns complex clinical guidance into personalised, digital care plans patients actually understand and follow. Built by doctors, proven in NHS systems, and trusted by clinicians, iOWNA is now planning to launch in Canada.

Millicent Stone
Founder & CEO

Panakeia

Panakeia revolutionizes cancer diagnostics with AI technology that determines critical biomarkers directly from routine H&E slides, eliminating additional laboratory testing. Their platform delivers same-day results versus weeks, reduces costs by up to 70%, and enables treatment decisions when tissue is limited.

Pahini Pandya
CEO

tendable

Tendable is a mobile-first quality assurance platform used by hospitals and long-term care homes to digitise audits, surface risks in real time, and improve care quality. Trusted across the UK, Canada, South Africa & ANZ, Tendable helps providers go paperless and stay inspection-ready, every day.

Joe Maniski-Luke
Engagement Lead

thymia

Thymia's technology objectively, accessibly and remotely measures mental state and respiratory health, analysing just seconds of voice. With niche scientific expertise and the largest global dataset (42,000+ individuals), they provide the most accurate depression, anxiety, fatigue, stress, and COPD measurements in the world.

Emilia Molimpakis
Co-Founder & CEO

Ufonia

Dora uses AI to automate routine clinical conversations through simple telephone calls, streamlining patient interactions, aiding clinician decision-making, and simplifying care coordination. Developed using clinically validated protocols, Dora is a UKCA and CE marked medical device. Dora has automated over 60,000 patient interactions across the UK and EU.
