

AMPERSAND

Ampersand is a behavioural health and health data company focused on immunology and inflammation. Key use cases for our health data include the remote monitoring and clinical prioritisation of patients by hospitals; and improving pharma companies' understanding of the behavioural, psychosocial and quality of life aspects of the patient journey - resulting in better research and patient support, and digital biomarker development.

Eye to the Future is a SaaS HealthTech using Data Analytics & Machine Learning and Data Insights to reduce unnecessary blindness by finding eye conditions earlier and allowing preventative measures & management. We use fundus images of the retina already taken by eye care professionals to identify changes over time which is vital for diagnosis and management of progressive diseases like Glaucoma.

David Bowie
CEO & Co-Founder
 David Bowie

Joy bridges the gap between medical and preventative care, enabling clinicians to connect patients to life-changing services faster. With proven success in the UK, Joy improves outcomes in primary care, preventative care, and mental health. We're keen to collaborate with European partners to bring these benefits to new markets.

Patrick Harding
CEO
 Patrick Harding

mendelian

Mendelian, a UK-based MedTech innovator, accelerates the diagnosis of rare and hard-to-diagnose diseases. Our proprietary AI technology, MendelScan, analyses electronic health records to identify potential cases, empowering clinicians with faster diagnoses and improving patient outcomes. This groundbreaking approach ensures no patient is lost in the system, leading to timely care and better health outcomes.

ABOUT GROW LONDON GLOBAL

Grow London Global is a free 12-month programme for London-based tech companies that want to expand internationally - the successor to the Mayor's International Business Programme, which has helped 1,300 London scaleups including Monzo, Revolut, Checkout.com, Brompton Bicycles, Mr & Mrs Smith and Bloom & Wild reach their global expansion goals.

The programme offers expert advice, workshops, events, networking opportunities with partners, corporates, investors, peers as well as unrivalled opportunities to make valuable contacts into your target market on trade missions across the world.

For more information, visit: grow.london/global

LIFE SCIENCE TRADE MISSION TO GERMANY AND SWITZERLAND 2025

THE FUTURE OF PATIENT CARE

Award-winning startup Oxford Heartbeat increases safety and accuracy of brain implant surgeries to treat cardiovascular disease and prevent strokes through AI-powered software PreSize® Neurovascular. Deployed in 13 countries, PreSize shows surgeons with 95% accuracy how implants fit in patients' anatomy, so the best is selected first-time, significantly improving patient outcomes.

Business Development Officer
 Emily Heron

ZIO Health's biosensor technology powers a handheld therapeutic drug monitoring device, providing real-time quantitative measurements of 'free/total' medication and biomarker levels using a few drops of blood. It enhances precision dosing by achieving the desired therapeutic effect while minimising potential side effects; improving patient clinical outcomes and drug development success rates.
