

SUSTAINABILITY TRADE MISSION TO LOS ANGELES

18-22 MAY 2025

ABOUT GROW LONDON GLOBAL

Grow London Global is a free 12-month programme for London-based tech companies that want to expand internationally - the successor to the Mayor's International Business Programme, which has helped 1,300 London scaleups including Monzo, Revolut, Checkout.com, Brompton Bicycles, Mr & Mrs Smith and Bloom & Wild reach their global expansion goals.

The programme offers expert advice, workshops, events, networking opportunities with partners, corporates, investors, peers as well as unrivalled opportunities to make valuable contacts into your target market on trade missions across the world.

For more information, visit: grow.london/global

AUAR

AUAR is transforming the production of housing through automation. Our pop-up robotic micro-factories produce sustainable, affordable timber housing at scale. We aim to bring our distributed manufacturing model to LA first, addressing its housing crisis, and then expand across California and the US to offer rapid, affordable and low-energy housing solutions.

Kevin Saey
Co-Founder & VP

bendi

Bendi provides AI-driven supply chain risk intelligence, helping businesses uncover hidden ESG risks, ensure regulatory compliance, and build resilience. As US regulations on sustainability and responsible sourcing tighten, Bendi enables companies in infrastructure, construction, and logistics to gain deep-tier visibility, mitigate supplier risks, and strengthen their operations in the US market.

Mandeep Soor
Co-Founder & CEO

CARBON RESPONSIBLE

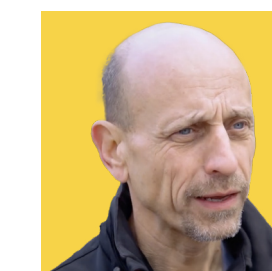

Carbon Responsible is the UK's most established Carbon strategy firm. With over 13 years of experience, we deliver actionable intelligence and audit-quality reporting with power machine learning tools that enable rapid, accurate reporting, all coupled with expert advisory to help you make sense of the data.

Matthew Paver
COO

EMSOL

EMSOL is an award winning air Pollution and emission reduction innovator - we manufacture and sell the top quality British engineering air quality monitors and sensors globally with advance climate impact applications to target the root cause of who and what is causing air and noise pollution.

Freddie Talberg
Founder & CEO

FYLD

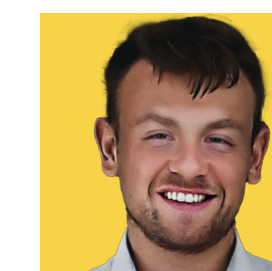

FYLD empowers efficient, safer, and sustainable infrastructure management with its AI-driven fieldwork platform. Since 2020, it has transformed operations across utilities, highways, and more, earning recognition from Energy Innovation Council and UK IT Awards. Learn more at fyld.ai or contact brynne.hazzard@fyld.ai for inquiries.

Brett Stein
Vice President,
Utilities - US

Gentian

A UK-based leader in AI-driven environmental analytics, Gentian empowers organizations to tackle biodiversity, forestry, and climate challenges with cutting-edge data solutions. With proven success in projects like Forests for Salmon Parks in Canada, we're expanding to the US to support sustainable development and climate resilience. Let's drive impact together.

Daniel White
Co-Founder & CEO

KLEANDRIVE TRANSFORMING TRANSPORT

Started in 2020, KleanDrive is an Essex based B Corporation that develops electric powertrains for existing diesel buses and trucks. Our mission is to accelerate the transition to clean electric transport by reducing the cost of electric vehicles and eliminating the impact of manufacturing new vehicles.

Joe Tighe
Co-Founder & CEO

nPlan

nPlan uses AI to forecast the outcomes of major construction projects around the world. We have trained our AI model on the historical performance of over 750,000 projects, the largest dataset in the world. Using nPlan, our clients are able to deliver their projects on time and within budget.

Americas

SUSTAINABILITY TRADE MISSION TO LOS ANGELES

18-22 MAY 2025

Renewabl[®]

Renewabl aligns energy consumption with output profiles of numerous wind and solar farms, optimising procurement on an hourly basis. We aim to help US corporates understand how renewable they truly are and trade PPAs, green tariffs, and certificates. Our goal is straightforward: streamline renewable energy procurement and ensure sustainable impact.

Zanna Cooper
Growth & Strategy

SEAB Power delivers modular, containerized anaerobic digesters that convert organic waste into renewable energy and biofertilizer on-site. Scalable and cost-effective, our solution helps U.S. businesses, farms, and municipalities reduce waste, lower costs, and meet sustainability goals while tapping into carbon credits and renewable energy incentives. Let's power a cleaner future together.

Sean Brophy
VP

SmartResilience[™]

SmartResilience is a climate adaptation company helping businesses in the US and globally safeguard assets and operations from floods, droughts, and wildfires. By providing tailored risk assessments, adaptation strategies, and early warning systems, we enable organisations to strengthen resilience, reduce business disruptions, and protect long-term profitability across supply chains and facilities.

Harish Pesala
CEO

Teknobuilt is revolutionizing Energy, Infrastructure, and Construction with its AI- and ML-powered platform, PACE OS. By integrating people, processes, and data, it enhances efficiency, mitigates risks, and accelerates project delivery. Proven to improve schedules by 30% and execution productivity by 38.6%, PACE OS has supported major projects for Exxon, Microsoft, PDO, Saipem, and Daewoo, setting a new industry standard.

Abhishek Srivastava
Co-Founder & MD

Deep-Tech Renewable energy company with patented 3D solar pipes which generate over three times more energy generation per area and the lowest cost per watt generation. No more roof installations or virgin land allocated to solar power generation.

Sam Budhdeo
CTO

watergate[®]

Watergate provides an AI-driven water leak detection and prevention platform that helps property owners reduce costs and mitigate risks. Already working with US-based companies like Greystar and Federated Hermes in the UK, we aim to expand into the US market to support large-scale real estate operators with smarter water management solutions.
